Background on Quality Checkups conducted by the Academic Quality Improvement Program

The Higher Learning Commission’s Academic Quality Improvement Program (AQIP) conducts Quality Checkup site visits to each institution during the fifth or sixth year in every seven-year cycle of AQIP participation. These visits are conducted by trained, experienced AQIP Reviewers to determine whether the institution continues to meet The Higher Learning Commission’s Criteria for Accreditation, and whether it is using quality management principles and building a culture of continuous improvement as participation in the Academic Quality Improvement Program (AQIP) requires. The goals of an AQIP Quality Checkup are to:

1. Affirm the accuracy of the organization’s online Systems Portfolio and verify information included in the portfolio that the last Systems Appraisal has identified as needing clarification or verification (System Portfolio Clarification and Verification);

2. Review with organizational leaders actions taken to capitalize on the strategic issues and opportunities for improvement identified by the last Systems Appraisal (Systems Appraisal Follow Up);

3. Alert the organization to areas that need its attention prior to Reaffirmation of Accreditation, and reassure it concerning areas that have been covered adequately (Accreditation Issues Follow Up);

4. Verify federal compliance issues such as default rates, complaints, USDE interactions and program reviews, etc. (Federal Compliance Review); and

5. Assure continuing organizational quality improvement commitment through presentations, meetings, or sessions that clarify AQIP and Commission accreditation work (Organizational Quality Commitment).

The AQIP peer reviewer(s) trained for this role prepare for the visit by reviewing relevant organizational and AQIP file materials, particularly the organization’s last Systems Appraisal Feedback Report and the Commission’s internal Organizational Profile, which summarizes information reported by the institution in its Annual Institutional Data Update. The report provided to AQIP by the institution is also shared with the evaluator(s). Copies of the Quality Checkup report are provided to the institution’s CEO and AQIP liaison. A copy is retained by the Commission for the institution’s permanent file, and will be part of the materials reviewed by the AQIP Review Panel during Reaffirmation of Accreditation.
Clarification and verification of contents of the institution’s Systems Portfolio

The team reviewed two iterations of the Systems Portfolio before arriving for the Quality Checkup visit to gain an understanding of the College. The second included updates to the data reported deficiencies noted in the Appraisal Feedback, but did not include interpretation of the additional data of process improvements completed or under consideration. The May 2007 version of the Systems Portfolio was prepared solely for the Checkup visit and was not apparently intended as an additional draft. This caused initial confusion among the team, and may cause similar confusion among other readers. The team recommends the intent of the second edition be more clearly identified.

During the visit, the team verified and clarified the contents of the System Portfolio through discussions held with the Chancellor, Provost, vice-Chancellor, the Chancellor’s Advisory Council, Program Directors, representatives of both faculty an student associations, and various cross-functional groups that included students, administrators, faculty, and staff. The information and results described in the AQIP Systems Portfolio were consistent with the information and results witnessed on campus.

Discussions with campus groups included the Institutional Quality Program, Institutional Profile, review of USDE Compliance Requirements, the Systems Portfolio, current Action Projects, strategic planning and priority identification, opportunities for improvement from the first Systems Portfolio, student learning and assessment, technology to support student learning, and learning support services.

In the team’s judgment, the institution presented satisfactory evidence that it met this goal of the Quality Checkup. The institution’s approach to the issue, documentation, and performance were acceptable and comply with Commission and AQIP’s expectations.

Review of specific accreditation issues identified by the institution’s last Systems Appraisal

The Systems Portfolio Appraisal did not reveal any accreditation issues.

In the team’s judgment, the institution presented satisfactory evidence that it met this goal of the Quality Checkup. The institution’s approach to the issue, documentation, and performance were acceptable and comply with Commission and AQIP’s expectations.
Review of the institution’s approach to capitalizing on recommendations identified by its last Systems Appraisal in the Strategic Issues Analysis.

The Appraisal Team prioritized five strategic issues for consideration by the institution, including:

- A process to identify leadership candidates
- Usability of process measures
- Presentation of multi-year data points
- Need for additional comparative data
- Need for more results data

The Institution has begun to address the strategic issues identified in the Systems Appraisal Feedback Report (March 2006) and has incorporated historical data beyond one or two years as recommended by the System Appraisal Feedback Report. It was not apparent to the team, however, that the institution fully appreciated or embraced the strategic issues and opportunities for improvement that surfaced through the Systems Appraisal. The institution reported confusion regarding the expectation for reporting from AQIP staff on its actions concerning the Strategic Issues identified. By way of clarification, the team was not disappointed with the descriptions provided by the institution, but rather by the perception that the feedback did not appear to be particularly embraced as valuable.

The team found the Systems Portfolio to be generally accurate and well understood. Although UWS agreed the Appraisal feedback was generally accurate, it appeared that efforts thus far to address opportunities for improvement identified within the Appraisal Feedback were largely focused on the expansion of data reporting rather than the more substantive observations offered within many of the opportunities for improvement. It appeared that UWS had not undertaken a particularly careful review or consideration of the points raised by the Feedback Report. For example, many observations noted declining trends, or institutional intentions (in the Systems Portfolio) to “ensure” certain processes or outcomes. It was not obvious that these trends had been analyzed, nor that consideration had universally been given regarding process development to ensure desired outcomes.

The team noted several interesting and exemplary activities while on campus, including, but not limited to: the continuous improvement approaches exhibited throughout the organization, the innovative use of technology, the process relationship between new initiatives and budget...
allocation, a planning process that provides broad-based and inclusive input to decision making, and a culture that clearly is data driven. The team was also struck by the use of the concept of “enduring goals” to reinforce constancy of purpose.

In the team’s judgment, the institution presented satisfactory evidence that it met this goal of the Quality Checkup. The institution’s approach to the issue, documentation, and performance were acceptable and comply with Commission and AQIP’s expectations.

Review of organizational commitment to continuing systematic quality improvement

There was significant evidence of the University’s continuing commitment to systematic improvement:

- Broad participation in the Quality Checkup visit from multiple constituents, most of whom were aware of the institutional commitment to continuous improvement and at least familiar with its concepts and tools,

- Multiple meetings with the Chancellor, and the commitment and leadership of the Provost indicated a both a broad understanding and strong organizational commitment to continuing systematic quality improvement,

- The receipt of the National Performance Excellence Award further demonstrates the institutional commitment to the quality journey,

- The team notes, however, that a Baldrige application is a step in an award process, while AQIP is a re-accreditation process designed to advance student learning through continuous improvement. While there is ample evidence of organizational commitment to continuous quality improvement, there was not the same enthusiasm for the AQIP processes.

In the team’s judgment, the institution presented satisfactory evidence that it met this goal of the Quality Checkup. While the institution’s approach to the issue, documentation, and performance were acceptable and comply with Commission and AQIP’s expectations, the team believes the level of institutional performance can be improved by re-thinking and adjusting the quality improvement program to better use the AQIP system and processes toward that end.

USDE issues related to default rate (renewal of eligibility, program audits, or other USDE
The institution provided a comprehensive and detailed documentation summary including:

- Student Loan Rate Default Evaluation
- Program Length, Credit and Tuition Policies
- Professional Accreditations
- The Student Complaint Process
- Third Party Comment
- Compliance with Title IV Regulations
- Sample Advertising and Student Recruitment Materials

While on site, the Checkup Visit team confirmed the accuracy of the data provided by the institution. Additionally, the Team noted the institutional participation with the Great Lakes Higher Education Guaranty Corporation and their thorough process to avoid student default. These complement the comprehensive loan management processes at the University (e.g. minimizing lenders among transfer students, conservative use of “alternative loans,” a loan consolidation campaign, and proactive student retention campaigns).

In the team’s judgment, the institution presented satisfactory evidence that it met this goal of the Quality Checkup. The institution’s approach to the issue, documentation, and performance were acceptable and comply with Commission and AQIP’s expectations.

Compliance with Commission Policy IV.A.8, Public Notification of Comprehensive Evaluation Visit

In anticipation of the Team visit, the University presented appropriate public announcements in the Dunn County News on February 25, 2007, and in the student newspaper (Stoutonia) on March 8 and March 22, 2007. One response was received by the Commission, and it, coincidentally, was complimentary.

In the team’s judgment, the institution presented satisfactory evidence that it met this goal of the Quality Checkup. The institution’s approach to the issue, documentation, and performance were acceptable and comply with Commission and AQIP’s expectations.
Compliance with Commission policy 1.C.7, Credits, Program Length, and Tuition

Institutional policy noted in the UW-Stout Curriculum Handbook and based on the University of Wisconsin System Policy on Academic Year Definition and Assorted Derivatives establishes standards for program length, credit allocation, and contact hours. The Institution presented a listing of program lengths and all met the minimum requirement, although 83% of those listed exceeded the standard 120 credit hour expectation.

The team was surprised to learn that the university considered students enrolled for one credit hour of academic credit within a co-op placement requiring 40 hours of work per week as full-time students. When discussing this, there was some confusion on campus regarding the practice, however, the Director of Financial Aid provided Federal Regulations that documented institutional compliance. Since co-operative education is identified by the institution as an important characteristic, additional staff training on the practice of treating 40 hour per week co-op participants as full-time students might be beneficial.

Tuition at UW-Stout is calculated based on credit hours. Students are also subject to fees in addition to tuition. Credits and program lengths comply with state standards.

Undergraduate Schedule

- E-Scholar (University-issued laptop)
  - Spring 07/Summer 07: $232.11 per credit

- Plateau (No Stout-issued laptop)
  - Spring 07: $229.94 per credit 1-12 credits
  - No additional charges for 12-18 credits
  - Additional $199.84 for each credit over 18
  - Summer 07: $229.94 per credit for 1-6 credits
  - No extra charge for 6-9 credits
  - Additional $199.84 for each credit above 9 credits

*Special note: Any customized instruction courses are charged separately from other courses in the plateau rate tables.
Graduate Schedule

- Per Credit
  - Spring 07/Summer 07: $317.02 per credit

- Plateau
  - Spring 07: $382.93 per credit for 1-9 credits
  - No additional charges for anything over 9 credits
  - Summer 07: $382.93 per credit for 1-5 credits
  - No additional charge for 5-8 credits
  - Additional $344.75 for each credit 9-10, no additional charge for anything above 10 credits.

*Special note: Any customized instruction courses are charged separately from other courses in the plateau rate tables.

Additional rate schedules are published for students participating in the Minnesota Reciprocity program and the Midwest Student Exchange Program.

In the team’s judgment, the institution presented satisfactory evidence that it met this goal of the Quality Checkup. The institution’s approach to the issue, documentation, and performance were acceptable and comply with Commission and AQIP’s expectations.

Compliance with Commission policy IV.B.2, Advertising and Recruitment Materials

The Team took the opportunity to review much of the advertising and recruitment materials used by the institution. The Team found the material to be accurate and to reasonably represent the University to its constituents. The institution is at the beginning stages of a formal “redefinition” of itself as a “polytechnic” institution. The team found some uncertainty on campus regarding the impact of this change, and recommends the university proceed cautiously to ensure advertising and recruitment materials continue to accurately portray the institution during and after this transition.

None-the-less, in the team’s judgment, the institution presented satisfactory evidence that it met this goal of the Quality Checkup. The institution’s approach to the issue, documentation, and performance were acceptable and comply with Commission and AQIP’s expectations.
Compliance with Commission policy III.A.1, *Professional Accreditation*, and III.A.3, *Requirements of Organizations Holding Dual Institutional Accreditation*

The University has provided information regarding its various accreditation entities.

In the team’s judgment, the institution presented satisfactory evidence that it met this goal of the Quality Checkup. The institution’s approach to the issue, documentation, and performance were acceptable and comply with Commission and AQIP’s expectations.
Compliance with Commission policy IV.B.4, *Organizational Records of Student Complaints*

The University has a formal, documented student complaint process. The Team had the opportunity to review student complaint process data and found a well-defined process regarding grade appeal in which a committee reviews the contested grade and circumstance and can change a grade awarded. The non-grade related appeals process was not as clearly defined, with the process described as “informal” at its initiation. Exploration of the “informality” noted there was likely a standard process that was followed and it could, perhaps be better described to connote its systemic nature. Similarly, the tracking and analysis of student complaint data might benefit from review and refinement.

In the team’s judgment, the institution presented satisfactory evidence that it met this goal of the Quality Checkup. The institution’s approach to the issue, documentation, and performance were acceptable and comply with Commission and AQIP’s expectations.

**Other USDE compliance-related issues**

None.

**Other AQIP issues**

- The team believes the University would benefit from an examination and possible refinement to its collection of important measurable data.

- Similarly, the team believes your strategic planning process might be improved through the inclusion of formal affirmation of mission and vision.

- Finally, the team believes the institution may benefit from documenting its decentralized quality improvement practices to identify internal “best practices” and promote internal improvement opportunities.
AQIP Checkup Visit at UW-Stout
