

**TRANSFER ARTICULATION AGREEMENT**  
between  
**University of Wisconsin–Stout**  
and  
**Colleges of the Wisconsin Technical College System**  
in  
**B.S. Career, Technical Education & Training**

The Bachelor of Science degree in Career, Technical Education & Training is a professional degree leading to certification to teach vocational trade and industrial courses. The degree has a 40 credit General Education requirement, 33 credit professional core component, and a 47 credit block of competence for technical area(s). For purposes of transfer between the Colleges of the Wisconsin Technical College System (WTCS colleges) and UW-Stout, technical area(s) are recognized as combined credits from areas for which the WTCS colleges offer either an A.A.S. or one/two-year diploma program.

UW-Stout recognizes successful completion of the program at the WTCS colleges is sufficient evidence to warrant acceptance of technical credits in this area toward the B.S. Career, Technical Education & Training.

General Education courses offered as a part of the A.A.S. program at the WTCS colleges in the areas of Communication Skills, Social Sciences, Math and Science may also transfer and be applied to the B.S. Career, Technical Education & Training program requirements or electives. These courses are pre-identified and are listed as to their transferability on the UW System Transfer Information System web site. Courses which have not been already identified as transferable general education courses may be reviewed on an individual basis. The B.S. Career, Technical Education & Training program director along with the UW-Stout Transfer Coordinator may request course syllabi and other documentation for review in order to make this determination.

Based on the above information, students transferring from a WTCS college with an A.A.S. degree *that includes* transferable courses within the general education categories stated above, and a minimum of 40 technical competency credits, will need approximately 64 additional credits to complete the B.S. Career, Technical Education & Training at UW-Stout. A student from a qualified A.A.S. degree program will typically transfer 16-20 credits of general education and 40 credits of Technical Competency (*this information may vary dependent upon the A.A.S. degree earned*).

The following guidelines apply for the B.S. Career, Technical Education & Training at UW-Stout:

1. Each student must satisfy the University ethnic studies and global perspectives requirements for graduation from the University of Wisconsin-Stout.
2. Remaining general education requirements may be fulfilled through any regionally accredited post-secondary institution. It is the student's responsibility to have official transcripts showing completion of these courses, including grades, forwarded to UW-Stout to be added to their academic record and counted towards the B.S. degree.
3. Students at UW-Stout will be required to complete a minimum of 32 credits in residence for a bachelor's degree at UW-Stout. By completing the Professional and technical studies portion of this degree, most students will satisfy the 30 credit residency requirement.
4. The program plan included with this agreement reflects the requirements in the Information and Communication Technologies program which pertains to this agreement. The plan sheet can also be viewed at <http://www.uwstout.edu/programs/bsctet/ppc.cfm>.
5. This articulation agreement applies only to the B.S. Career, Technical Education & Training in effect 2013 fall semester until revised. A change of major invalidates these courses/credits for transfer unless they are approved within another program-to-program articulation agreement for another major program at UW-Stout.

***Signatures completed May 2014. A copy of the signed agreement available upon request.***
