Local Briefs: Deer runs loose in UW-Stout building

MENOMONIE — A deer that crashed through a window Wednesday at the UW-Stout Vocational Rehabilitation Building caused an estimated $5,500 in damage, according to university officials.

That estimate includes repairing the window and cleaning up the blood trail left by the deer on the ground floor of the building.

Authorities said the deer crashed through a window on the east side of the building at about 4:10 p.m. after being chased by a dog. The deer exited the building through automatic doors on the south side.

The window has been boarded up until workers can fit a new piece of glass.

Authorities tracked the deer as it ran south through campus, but the blood trail ended, and the deer was not located.
