B.S. Vocational Rehabilitation  
Community-Based Rehabilitation Concentration

This concentration provides students with entry-level job skills for community-based rehabilitation positions (e.g., supported employment, employment and training programs, independent living support, and other community support services).

Community-Based Rehabilitation Concentration Objectives:

1. Implement supportive employment programs for the disabled.
2. Implement transitional employment services for the disabled.
3. Participate in collaborative planning for community-based services for the disabled, including education, rehabilitation, business and industry, and independent living services.
4. Comply with federal and state regulations regarding community-based living and employment.
5. Access support resources to establish community services for the severely disabled.
6. Develop strategies to overcome physical, financial, and psychological barriers to community integration for the severely disabled.
