

Minors

Introduction

Minors are defined as either “studies in the discipline” or as “teaching.” Teaching minors are those approved by the State Department of Public Instruction for licensure. Requirements for teaching minors include an education major, passing score on the content exam for the minor, portfolio evidence of competence in the Wisconsin Teacher

standards and the minor’s content, and student teaching experience in the minor field. Contact the School of Education for information regarding teaching minors. Approval forms and minor program plans are available from the School of Education office and the department offices offering the minor.

Biology

Department of Biology

20 credits required

Select one of the following:

- BIO-101 Introductory Biology.....4
- BIO-111 Science, Society, and the Environment.....4
- BIO-132 Human Biology.....4
- BIO-135 Organismal Biology4

Additional courses to complete 20 credits will be selected in consultation with a biology minor adviser and with the approval of the biology department chair. Selected courses must include two laboratory courses, at least one of which must be at the 300 level or above. A minimum of six credit must be taken in the UW-Stout Biology Department. A maximum of 14 transfer credits may be applied to the minor. A minimum grade of “C” is required for all courses applied to the Biology minor.
