The **UW-STOUT APPLIED RESEARCH CENTER** specializes in providing educational institutions and non-profits with results that can directly influence decision making and be used for benchmarking against peer and national comparisons.

We conduct surveys — utilizing benchmarking surveys or site-specific surveys — in order to build you a database for decision making. We also provide reporting, web and paper survey administration, and follow-up services. With our focus on quality improvement, you can expect clear, concise summaries that are easy to read and interpret.

UW-Stout was the first university to receive the prestigious Malcolm Baldrige National Quality Award. The Applied Research Center is committed to following in this path of excellence. When you work with our Applied Research Center, you know you are getting the best minds, the most creative process and the freshest approach to doing research. We want your institution to be able to take our research and apply it to your institutional community in the most effective way possible to create meaningful change. We will be with you each step of the way in order to accomplish your goals.
EXPERIENCED STAFF

Staff and consultants have Doctoral and Masters level training on research and evaluation.
Extensive experience with accreditation data needs, survey development, survey administration, statistical analysis, qualitative analysis and focus groups.

SPECIALIZED EXPERTISE

OUR STAFF HAS EXPERTISE IN
