Using Technology to Enhance the Learning Experience

Please join Dr. Jon Landis, US Development Executive, Apple Inc., for a discussion about learning, teaching and mobile technology on Thursday, October 23rd, from 1-3 p.m. in the Oakwood Room, Memorial Student Center.

Discussion: Mobile Pedagogy

It is often said that technology is changing the educational landscape. While this may be true, mobile devices have done more than shift the educational terrain - it's blown up the bedrock. Mobile pedagogy represents a fundamental shift in content access and the role of the traditional classroom. This particular presentation isn't about trendy technology fads or the latest gadgets... rather it is about facing the challenges and maximizing the possibilities of a connected world. In addition to exploring the dynamics of this new educational paradigm, we will examine the practical implementation strategies to improve learning.

This first 60-minute interactive session has three parts:

- **The Why** - Do mobile devices have a place in the learning experience?
- **The How** - How does a mobility-rich environment work?
- **The What** - What are current colleges and universities doing as a part of the mobility revolution?

* The remaining 60-minutes will be reserved for open discussion, questions and answers. If you can’t join us for the full 2 hours, please feel free to join us and depart, at any time.

**Dr. Jon Landis** is the US Development Executive with Apple Inc. He is a former professor in the College of Education from Millersville University where he was the graduate coordinator of the Leadership Program and the Coordinator of the CyberSafe Institute. Jon holds his Ph.D. in Sociology, a Masters degree in Education Leadership, and a B.S. in Chemistry. He has served as a chemistry instructor, principal, curriculum director, and IT Director. Dr. Landis speaks nationally on the opportunities associated with mobile technology in education.

Discussion hosted by Learning Technology Services.
